Summary

Project Manager and Computer Science graduate student with experience leading complex projects, coordinating teams, managing schedules and documentation, and developing technical solutions. Background includes construction project management, web development, system administration, and technical support. Combines project leadership with hands-on technical experience, strong problem-solving skills, and the ability to coordinate technical and organizational requirements from planning through implementation.

Experience

DeGroff Aviation Technologies

March 2025 – Present

Web Developer, Contract

Remote

- Develop and maintain the company website using Next.js, React, TypeScript, and Tailwind CSS for a commercial aviation product.
- Build responsive components and manage deployment, domain configuration, analytics, SEO, technical documentation, and customer contact functionality.
- Translate company and product requirements into website features, technical content, and maintainable solutions supporting customer outreach and product presentation.

Coon Restoration & Sealants, Inc.

April 2023 – November 2025

Project Manager

Louisville, Ohio

- Managed large-scale restoration projects including Progressive Field, Akron City Schools restorations, and the Moundsville Municipal Building.
- Coordinated subcontractors, schedules, inspections, material logistics, and daily field operations to meet project requirements.
- Managed RFIs, submittals, change orders, documentation, meetings, and communication between owners, architects, engineers, subcontractors, and field personnel.
- Reviewed project requirements and coordinated field activities, documentation, and stakeholder communication from planning through project completion.

Tech N Rescue

November 2024 – Present

Treasurer

Ohio

- Manage financial records, income and expenses, transaction documentation, budgeting, and financial planning.
- Help organize rescue training classes, including scheduling, instructors, class requirements, and organizational coordination.
- Maintain Linux-based systems used for radio coordination and location tracking of search personnel during rescue operations.

For A Child LLC

January 2019 – Present

Web Developer and System Administrator, Volunteer

Canton, Ohio

- Design, develop, and maintain the organization's website with a focus on accessibility, usability, and community outreach.
- Maintain organizational computers, mobile devices, websites, and other technology while providing technical support.
- Support technology needs by troubleshooting systems and identifying practical solutions for day-to-day organizational operations.

Projects

DeGroff Aviation Technologies Website

2025 – Present

Web Development Project

- Developed a production website using Next.js, React, TypeScript, and Tailwind CSS with responsive layouts and reusable components.
- Integrated GitHub Actions deployment, EmailJS, Google Analytics, SEO metadata, technical documentation, and a custom domain.

For A Child Website

2026 – Present

Web Development Project

- Redesigned and developed the organization's website to improve usability, accessibility, and mobile responsiveness.
- Reorganized programs, resources, and outreach content to make information easier for visitors to find.

Orion AI

2026 – Present

Personal Full-Stack AI Project

- Built a self-hosted AI workspace supporting local Ollama models and optional OpenAI, Anthropic, and Google AI providers.
- Containerized the system with Docker Compose and implemented authentication, provider configuration, persistent storage, and automated model initialization.
- Designed the application to support configurable local and cloud AI providers through a single interface while keeping deployment and configuration manageable for self-hosted use.

Education

Clemson University

January 2025 – Present

Master of Science in Computer Science

Clemson, South Carolina

Kent State University

August 2020 – April 2024

Bachelor of Science in Construction Management

Kent, Ohio
