Summary

Software Developer and Computer Science graduate student with experience designing, developing, and deploying production web applications and AI-powered solutions. Passionate about building reliable software that solves real-world problems.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++
Web Development: React, Next.js, Node.js, REST APIs, Tailwind CSS, HTML, CSS
Data and AI: PostgreSQL, Prisma, SQLite, Pandas, NumPy, TensorFlow, Scikit-learn, Ollama
Developer Tools: Docker, Docker Compose, Git, GitHub Actions, Linux, AWS, Google Analytics

Experience

DeGroff Aviation Technologies

March 2025 – Present

Web Developer, Contract

Remote

- Develop and maintain a production marketing website using Next.js, React, TypeScript, and Tailwind CSS for a commercial aviation product.
- Architect a static-export application with the Next.js App Router for deployment through GitHub Pages and a custom domain.
- Implement automated CI/CD workflows with GitHub Actions and build responsive interfaces with reusable components, animations, embedded media, and downloadable technical documentation.
- Integrate EmailJS lead capture, environment-based configuration, SEO metadata, canonical URLs, Open Graph tags, and Google Analytics.

Tech N Rescue

November 2024 – Present

Technical Specialist, Volunteer

Ohio

- Design and improve workflows for device intake, repair tracking, inventory management, volunteer coordination, and distribution.
- Maintain Linux and Windows environments while troubleshooting hardware, software, networking, and system issues.

For A Child LLC

January 2019 – Present

Web Developer and System Administrator, Volunteer

Canton, Ohio

- Design and develop a new responsive organizational website focused on accessibility, usability, community outreach, and clear presentation of services.
- Maintain websites, Windows systems, mobile devices, digital content, and organizational technology while supporting marketing and troubleshooting needs.

Projects

Orion AI

2025 – Present

Full-Stack AI Developer

- Built a self-hosted AI workspace supporting local Ollama models and optional OpenAI, Anthropic, and Google AI providers.
- Containerized the application and Ollama model server with Docker Compose and persistent storage for configuration and chat data.
- Implemented password authentication, first-run setup, runtime credential generation, provider configuration, and automated local model initialization.

Asset Intake and Repair Tracker

2024 – Present

Full-Stack Developer

- Built a full-stack application for managing donated devices through intake, repair, inventory, and distribution workflows.
- Implemented role-based authentication, protected routes, multi-user access, repair tracking, parts management, and volunteer assignments.
- Integrated PostgreSQL and Prisma with a Next.js, TypeScript, Tailwind CSS, NextAuth, and REST API architecture.

Personalized Movie Recommendation System

2025

Machine Learning Project

- Built collaborative filtering, hybrid recommendation, and two-tower retrieval models using Python, TensorFlow Recommenders, LightFM, and Surprise.
- Processed and analyzed movie datasets using Pandas and NumPy.
- Evaluated model performance using Precision@K, Recall@K, and NDCG@K.

Education

Clemson University

Master of Science in Computer Science

January 2025 – Present

Clemson, South Carolina

Kent State University

Bachelor of Science in Construction Management

August 2020 – April 2024

Kent, Ohio
